2. The authorization is valid for a period of five years from the date of the decision of the AGM.

Investments

Board of Directors and Management

Componenta's Annual General Meeting on 26 February 2007 elected the following to the Board of Directors: Heikki Bergholm, Heikki Lehtonen, Juhani Mäkinen, Marjo Raitavuo and Matti Tikkakoski. The Board elected Heikki Bergholm as its Chairman and Juhani Mäkinen as Vice Chairman.

At the end of the year the corporate executive team of Componenta Group comprised President and CEO Heikki Lehtonen; Olli Karhunen, Senior Vice President, Foundries division; Michael Sjöberg, Senior Vice President, Machine shops division; Hakan Göral, Senior Vice President, Componenta Döktas division; Jari Leino, Sales Director, Heavy Trucks; Anu Mankki, Senior Vice President, Human Resources; Marko Sipola, Senior Vice President, Business Development; Yaylalý Günay, Senior Vice President, Investments, and Pirjo Aarniovuori, Communications Director.

Mika Hassinen was appointed CFO of Componenta Corporation and a member of the corporate executive team as from 2 January 2008.

Personnel

During 2007 the Group had on average 4,206 (2,196) employees. At the end of the year the Group had 4,158 (4,316) employees. The number of Group personnel at the end of the year including contract labour was 5,064 (5,249). At the end of 2007 51% of the Group's personnel were in Turkey, 22% in Finland, 17% in the Netherlands and 10% in Sweden.

Environment

Componenta is committed to continuous improvement and to reducing the environmental impact of its production processes. The objectives of the Group's environmental policy are to reduce consumption of energy and raw materials, restrict particle and VOC emissions, and reduce environmental noise from its operations. It also aims to increase the sorting of waste and reduce the amount of waste that cannot be reused.

One of the most significant environmental aspects for Componenta Group is the use of energy. In 2007 the Group used 814 GWh (809 GWh) of energy. Most of the energy used, 68%, is electricity. The foundries consume more than 90% of all the energy, for especially the melting processes at the foundries utilise much energy. In 2007 energy consumption at Componenta Group foundries in proportion to output fell by about 5% compared to 2006.

Componenta will publish its 2007 environmental report during the spring 2008.

Research and development

At the end of 2007, 89 people worked in research and development at Componenta, which corresponds to 2% of the company's total personnel. Componenta's R&D expenses in 2007 totalled EUR 2.3 (1.4) million. This is 0.4% (0.4%) of the Group's total net sales.

Risks

Fluctuations in the prices of Componenta Group's main raw material, scrap metal, affect the sales margins on the Group's products. When the price of scrap metal rises, the increase in the price of the raw materials can be passed on to the products supplied to customers after a certain delay, so price increases in scrap metal reduce the sales margin temporarily. When scrap prices go down, the Group's margins improve for a while.

The electricity consumption of the Group's foundries and machine shops creates a spot price risk for the purchased electricity, so the Group purchases electricity price forwards to hedge against the impact of electricity prices on the financial performance. The target hedging level for the forecast electricity consumption by the Group's production plants is 90% for the next 12 months, 60% for the following year and 40% for the third year. Trading in electricity price forwards has been outsourced. The Group aims to pass on the increase in the price of electricity to customers with a separate electricity surcharge

Appropriate insurance has been taken against risks associated with assets and interruption of operations and to minimize indemnity.

The financial risks relating to Componenta Group's business operations are managed in accordance with the treasury policy approved by the Board of Directors. The objective is to protect the Group against unfavourable changes in the finance markets and to secure the Group's financial performance and financial position. Management of financial risks takes place in the corporate treasury function

Following the acquisition of Döktas, Componenta now has a significant currency position in Turkish lira. The company hedges the translation and transaction risks in accordance with its treasury policy. Despite the hedging, however, any changes in the value of the Turkish lira in relation to other currencies, especially the euro, US dollar and GB pound, may have an impact on Componenta's financial performance in the short term.

The Group has no significant concentration of risk for receivables. The Group recognized no major credit losses in 2007.

The company's financial agreements contain, in addition to normal covenant terms, also clauses according to which the company's loans may fall due for payment before the maturity date if control of the company changes in consequence of a public purchase offer. The company is not party to any other significant contracts that will come into force, that can be amended or that can cease to be valid if control of the company changes in consequence of a public purchase offer.

Events after the end of the period

Componenta announced on 15 January 2008 that the Group's result after financial items excluding one-time items totalled EUR 14.9 (5.0) million in 2007. The result fell short of the forecast given earlier. At the same time production capacity usage at the Group's foundries and machine shops is high due to the strong demand in the market. In consequence, investments of some EUR 12 million are being made at the foundries in Karkkila, Finland and Orhangazi, Turkey. These investments will be made during 2008 and will increase the Group's casting capacity by about 45,000 tonnes, which will make possible additional annual sales of some EUR 65 million.

Publication of Annual Report

Componenta Corporation will publish the printed annual report 2007 during week 7.

Prospects

Componenta's prospects in 2008 are based on general external financial indicators, order forecasts given by customers, and on Componenta's order intake and order book.

The demand outlook in all the Group's customer sectors is good at the beginning of 2008. Componenta's order book at the end of 2007 was 35% higher than at the same time in the previous year, corresponding almost full capacity utilization. Global uncertainty in the finance market and unfavourable developments in exchange rates may weaken Componenta's prospects during the year.

Combining the operations of Componenta and Döktas and enhancing the performance of the business units are expected to have a positive impact on the Group's operating profit in 2008.

Componenta Group's 2008 net sales are expected to increase and the result after financial items, excluding one-time items, is expected to improve on the corresponding figures for 2007.
