## Offers and new sales

Average monthly offers > 100,000 EUR

- The offers submitted by the Group stayed on high level.
- Also Componenta's new sales developed well during the first half of 2012.

## Development of business segments

## COMPONENTA

## Performance of the Turkey operations

## Net sales

Operating profit excluding one-time items

$2011 \longleftarrow 2012$ - 2011 \% $\triangle 2012$ \%

| MEUR | Q1-Q2 <br> 2012 | Q1-Q2 <br> 2011 | Change |
| :--- | :---: | :---: | :---: |
| Order book | 46.5 | 53.8 | $-14 \%$ |
| Net sales | 146.5 | 140.5 | $4 \%$ |
| Operating profit | 15.8 | 16.8 | $-6 \%$ |
| Personnel | 2,665 | 2,526 | $6 \%$ |

- Operating profit of the Turkey operations in the second quarter compared to previous year was negatively affected by the higher energy costs, the revaluation of Turkish lira and increased regional raw material prices.

## COMPONENTA

## Performance of the Finland operations

## Net sales

Operating profit excluding one-time items

- The review period operating profit of the Finland operations improved clearly from last year mainly because of the operations of two loss making Finnish units were discontinued at the end of 2011.

## COMPONENTA

## Performance of the Holland operations

## Net sales

Operating profit excluding one-time items

$$
\square 2011 \square 2012 \sim \sim 2011 \% \sim-2012 \%
$$

- Second quarter operating profit of the Holland operations declined due to several production break-downs in the Heerlen foundry and increased maintenance costs.

## COMPONENTA

## Performance of the Sweden operations

## Net sales

Operating profit excluding one-time items

| MEUR | Q1-Q2 <br> $\mathbf{2 0 1 2}$ | Q1-Q2 <br> 2011 | Change |
| :--- | :---: | :---: | :---: |
| Order book | 26.9 | 22.9 | $17 \%$ |
| Net sales | 67.7 | 64.8 | $4 \%$ |
| Operating profit | 1,0 | 2.7 | $-64 \%$ |
| Personnel | 405 | 416 | $-3 \%$ |

- The operating profit of the Sweden operations in the review period reduced from the previous year mainly due to higher raw material prices and freight costs, and lower productivity.

## Prospects 2012

## COMPONENTA

## Market outlook 2012

## Demand

 uncertainDemand continues favourably

Demand prospects in the heavy trucks industry continue to be uncertain at the beginning of the third quarter.
At the end of June, the order book for Componenta's heavy trucks customer sector was $10 \%$ higher than at the same time in the previous year. Demand is expected to develop positively during the second half of 2012 and in 2013 because low level of registrations of new heavy trucks during the past years has resulted in ageing fleet of heavy trucks. In addition, new environmental regulations coming into force in Europe at the beginning of 2014 are expected to increase demand.

The order book for Componenta's construction and mining customer sector was $34 \%$ lower at the end of the period than in the previous year.
Major customers have started to minimize the stock levels, but the production is expected to normalize towards the year end.
Anyhow, the total market is expected to grow this year.

## COMPONENTA

## Market outlook 2012

Demand
on the
same level

Demand to grow

Demand to decrease

At the end of the review period, the order book for Componenta's machine building customer sector was $4 \%$ higher than at the same time in the previous year.
Demand in the machine building industry is expected to remain at the same level as in the previous year.

The order book for Componenta's agricultural machinery customer sector was $9 \%$ higher at the end of the review period compared to the same time in the previous year.

Demand for agricultural machinery is estimated to rise from its 2011 level mainly due to relatively high food prices.
The market is expected to grow 5-10\% in 2012.

The order book for Componenta's automotive customer sector was 33\% lower at the end of the review period than at the same time in the previous year.
Demand in the automotive industry is estimated to decline 3-10\% in 2012.

## COMPONENTA

## Componenta's prospects in 2012

- Componenta's prospects for 2012 are based on general external economic indicators, delivery forecasts given by customers, and on Componenta's order intake and order book.
- Componenta's order book at the end of the review period was $10 \%$ lower level compared with the same time in the previous year.
- Full year net sales in 2012 are expected to remain at the same level as in the previous year or to rise slightly.
- As the result of the price rises that have been implemented and the closing down of three loss-making units, the operating profit is expected to show a clear improvement. Although the operating profit of the review period remained on the same level as in the previous year, the second half of this year is expected to be better than last year. Previous year operating profit was burdened by the quality defects in Orhangazi Turkey and the increase in non-surcharged raw material prices. The result after financial items excluding one-time items is expected to improve significantly, bearing in mind the low level of the figure for comparison.
- Net cash flow from operations is expected to improve clearly and changes in working capital should continue to be moderate. Investments in production facilities in 2012 are expected to be some EUR 15 million.
